Coolmine are delighted to announce the 16th European Federation of Therapeutic Communities Conference (EFTC) Pathways of Care to Recovery will be held in Dublin, Ireland on 20th, 21st and 22nd September 2017.

The European Federation of Therapeutic Communities (EFTC) was established in 1981 and is a network of drug and alcohol treatment communities across Europe, and internationally, all learning from each other whilst ensuring delivery of quality and evidence based treatment and rehabilitation services.

Coolmine TC was established in 1973 and provides a range of community, day and residential services to people and their families impacted by problematic substance use.

EFTC conference provides a learning platform for participants to present scientific and practitioner based research and to exchange ideas in relation to the conference themes.
